BATHROOMS

As well as carrying out our normal, everyday school maintenance duties, we also carry out refurbishments and general improvements to our local schools.

More recently we've carried out a number of toilet installations, particularly providing **uni-sex** facilities, to save space.

Each cubicle is full height for privacy and individually ventilated.

In order to make the process as trouble free as possible, we offer a design and build service for our clients. We take care of all the planning and design, the making of applications where necessary, form filling (effectively, a one-stop shop).

We provide you a full set of plans, with samples of the materials to be used. From this information we will include a fixed price quotation, which is free of any obligation or cost on your behalf. References for our previous work in other schools in the area, are available before any commitment is made.

One call does it all !
